Published Every Week  
of the Year.

Vol. 2

Palm Springs, California, Friday, October 16, 1936

No. 11

Tuesday evening, October 13th (I wish to record the date), I saw a young road runner, the first I have seen on the desert. That may sound strange to you, but have you seen a young roadrunner? Possibly what you thought was a roadrunner was really a Leconte thrasher which is often mistaken for the young roadrunner. The young bird appeared to be just as wise as its elders and seemed to possess the same humorous outlook upon life.

If you are interested in looking for things that are rare, try finding a seedling creosote bush. So far I have not found one, neither have I met a single person who has seen one.

The individuals of the known world's flora have been classified into families, genera, and species, but sometimes in the light of additional information an individual is reclassified which may bring it to a new name. In some of the plantings about desert homes is found an exotic palm generally known as Cocos plumosa. It has been reclassified and placed in another genus thus acquiring a new genus name, so now when this palm is called Cocos plumosa the incorrect name is used.

I have just received a booklet from Dr. L. H. Bailey in which he discusses some of the palms, among which is this palm. Its new name is *Arecastrum Romanzoffianum*. This is not so euphonious as *Cocos plumosa*; there is something in the pronunciation of *Cocos plumosa* that allows the name to roll from the tongue easily, almost glibly, but if we are to be correct we must now call this palm *Arecastrum Romanzoffianum* which is not a difficult name if one practices a few times, as it is pronounced as spelled; the species name is in honor of a Russian Count by the name of Romanoff; just add the "ianum."

In the good old days expeditions of scientific nature were sent out much as today by individuals, institutions, universities and museums. Count Romanzoff sponsored an expedition in the early nineteenth century and it was this group of men that discovered the palm in Brazil. However, in 1860 William Jackson Hooker described the palm, giving it the name of *Cocos plumosa*, which name came into wide spread usage.

But to quote from Dr. Bailey's booklet, "Hooker was unaware that his palm had been described and figured thirty-eight years earlier as *Cocos Romanzoffiana* by the poet-botanist Louis Charles Adelbert von Chamisso in the work *Picturesque Voyage* written by Louis Choris who was artist of a memorable journey. Chamisso and Choris were members of the Otto von Kotzebue Russian expedition around the world that was fitted out by Count Nikolai Petrovitch Romanzoff to visit far away lands and to explore the Bering Sea. In the party also were Eschscholtz as physician, and Wormskold the Dane who contributed his knowledge of travel and natural history. Choris introduces his book with a portrait of Count Romanzoff."

"The Palm was discovered on the island of Santa Catharina, southern Brazil, in December, 1815. The expedition sailed from Kronstadt, Russia, on July 30th of that year, reached Chili in February, 1816, and San Francisco in October, 1816. It came to an end on August 3, 1818, when the two-masted brig Rurik anchored in the Neva at St. Petersburg, in front of Count Romanzoff's palace."

What grand times the members of these early expeditions had; a virgin botanical field in which to explore and return with seeds of strange plants to plant in the European botanical gardens; new species to describe; and the adventures in strange lands where white man had not disturbed nature. The best we can do today is to follow in their footsteps but the way is all charted and signed; the next best thing we can do is to read accounts of these expeditions. If you have not found some of these old books you are missing tales of adventure that go back into time when traveling was a hazardous feat. It is from the

(Continued on Last Page)

## STAR 12-UNIT APARTMENT NEAR DEL TAHQUITZ

Construction started yesterday on an apartment house of 12 units at the corner of Palm Canyon Drive and Baristo Road, directly opposite Hotel del Tahquitz.

The building, which will be of hollow cement tile, and two stories in height in the rear, is being built for Joseph Miller, Hollywood druggist, and will be operated by Miss Beverly Miller. Contractor David Tierstein of Hollywood is the builder, and his brother, Raymond Tierstein, Los Angeles realtor, made the deal.

The apartment house will be built L-shape, with south and west exposure, there being a large patio along the Baristo street frontage enclosed by a wall. It will be completed within seven weeks.

## FAMOUS MOVIE FOLK GUESTS AT THE DESERT INN

Among recent guests at the Desert Inn were three famous English screen stars, Miss Merle Oberon and her fiancé, David Nevin, and Bryan Aherne. Other motion picture stars at the Inn were Misses Astrid and Ruth Allwyn of Beverly Hills, and the famous director, Edmund Goulding, who is at the Inn while his home in Tahquitz Desert Estates is being prepared for the winter.

Other guests at the Desert Inn include:

Mr. and Mrs. R. V. Edwards, Glendale; Mr. and Mrs. Fred R. Morgan, Beverly Hills; Mr. and Mrs. W. A. C. Smith, Cleveland; Mr. and Mrs. T. P. Cooper and son, Los Angeles; Mrs. Virginia Caldwell, mother of Mrs. Cooper; Mrs. Harold Sheffelman, wife of a Seattle attorney; Mrs. G. W. Alexander, Santa Monica; A. M. Smith, Tucson; John Wharry Lewis, San Francisco.

Also Mr. and Mrs. F. J. Roemer, San Francisco; Mr. and Mrs. I. J. Miller, Los Angeles; Mr. and Mrs. R. H. Westling, Los Angeles; Mr. and Mrs. Darril W. Herron, Pacific Palisades; Mr. and Mrs. R. F. Starkey, New York; Wm. C. Cummings and Miss Caryl, Chicago; John T. Cooper, Los Angeles.

## \$15,000 FLOOD CONTROL WORK IS UNDER WAY

William Seaton, excavation contractor, has started on a \$15,000 flood control project, financed by property owners of Smoke Tree Ranch and Araby.

Beginning at the southwest corner of Araby and extending about 10,500 feet to the northeast corner, a channel 175 feet wide is to be constructed to prevent floodwaters of Palm Canyon creek from encroaching upon adjoining property.

The dikes are to be of dirt and will be five feet high, nine feet wide at the bottom and six feet at the top. The channel side of the dikes will be protected with steel posts and Elwood steel fencing, back-filled with rocks. The channel will connect with the Coachella Valley Flood Control channel, and will greatly reduce the dip in the highway near Araby and Smoke Tree ranch.

The project has been approved by engineers of the State Highway Commission and the Coachella Valley Flood Control District.

Gus Parrish, lessee of the Palm Springs Airport, arrived here last week, and with Andy Anderson is getting things under way at the airport for a very busy season.

## \$156,100 NEW BUILDING IN PAST 15 DAYS

Twenty-two separate construction jobs, totaling \$156,100, were started in Palm Springs during the first 15 days of this month, as shown by a survey of the community made by Joe Schobe, of the Mason Case Company. This brings the total of new construction started since the first of the year to \$2,169,400, the total for the first nine months having been \$2,013,300, as reported previously in *The Desert Sun*.

Mr. Schobe's survey does not include any buildings under \$2,000 in value, nor any repair jobs under that value, such as would be included in construction figures in cities where building permits are issued.

According to these figures, Palm Springs is still in seventh place in Southern California, exceeding Riverside and San Bernardino combined, and being far more than such cities as Santa Barbara, Santa Ana, and other large communities.

## BULLOCK'S NEW 1937 DEMONSTRATION HOME UNDER CONSTRUCTION

Contractors Atkin & Marsh have started construction on the 1937 Bullock's Demonstration Home, just a short distance east of the demonstration home built for Bullock's last winter. The new house is even more beautiful and more modern in design than the last one. It is of the modern French type of architecture, and will be completely furnished by Bullock's. Brewster & Benedict are the architects.

## NEW PASTOR IS WELCOMED BY THE COMMUNITY

The social hall of the Community church was filled last evening when the citizens gathered to greet the new pastor, Dr. John Robertson Macartney, and Mrs. Macartney. Heads of the various civic organizations were present to extend words of welcome.

Rev. B. B. Weatherall, former pastor of the church, had charge of arrangements, and was called upon to preside. He called on Dr. Earle C. Harvey of Beaumont, moderator of the Riverside Presbytery; Frank V. Shannon, secretary of the Chamber of Commerce; Francis Crocker, president of the Junior Chamber of Commerce; Miss Katherine Finchy, principal of the Palm Springs school; Chief Willie Marcus of the Agua Caliente tribe of Indians; Carl G. Lykken, representative of the session of the local church; Mrs. Nellie N. Coffman; Dr. Ernest McCartney, of Upland, brother of the local pastor; Mrs. Ernest McCartney; Mrs. John Robertson Macartney, and the pastor.

When Mrs. Coffman was asked to speak, she stated that all the organizations were represented, however, she would speak for the largest group in Palm Springs, viz: the Sinners. Mr. Lykken said this gathering was much different from the first church affair held in Palm Springs of similar nature, when a tent was put up for the occasion, and the only guest was a cow that happened to walk into the tent.

Mrs. Belle Manning Hager gave two vocal selections, accompanied by Miss Florence Newberry at the piano.

After the reception Mrs. Charles S. Henderson, Mrs. H. L. Hansen and other ladies served refreshments.

Carol Bonte has opened the Bonte-Lee Library and Book Shop facing the theatre lobby. The circulating library did exceptionally well last season, and there was a strong demand for the purchase of books. To meet this growing demand a fine stock of the current best sellers has been added.

## INDIANS REPLY TO CHARGES IN FEDERAL SUIT

The Los Angeles Times on Tuesday told of a suit filed by Mrs. Genevieve P. St. Marie of the local reservation in Los Angeles in the court of United States District Judge Stephens. Said the Times:

"The plaintiff and her faction contend they have been denied income from their allotment of the 30,000 acres in the reservation situated in and bordering the desert winter resort. Mrs. St. Marie told the court that the \$30 a month income from her acreage, which has been leased to Frank Courtemanchi for a picnic grounds has been paid the tribal committee instead of to her.

"Word leaked into the testimony that an offer of \$1,500,000 has been made for the 30,000 acres with a plan in view to moving the Indians a couple of miles farther into the desert and giving them the income from the purchase price of their present holdings.

"At the close of the court day, Judge Stephens, through an interpreter, Mrs. Ramalda Taylor, speaking the Cahuilla language, told the Indian delegation to return to their reservation confident that the United States government will look out for their interests.

"Pending the litigation he directed that the income from the acreage claimed by Mrs. St. Marie be set apart."

Willie Marcus, spokesman for the tribal committee, yesterday issued the following statement:

"To the Interested Public: "So that the facts might be known by the interested public, as to just what is the status of the "suit" in allotment, we give you this information."

"Judge Stephens of the U. S. District Court heard a petition of a man by the name of Sloan, who we understand has been acting as the attorney for a minority group of persons on the roll of our reservation. They claim they are the owners of certain tracts of our tribal land, that it has been allotted, and demand that two white persons be removed. Our contention has always been that this is not allotted land—it is owned by the tribe as a whole. The Secretary of the Interior's records show our position to be true—that it is not allotted.

"However, it is reported on good authority that this attorney has induced some of these Indian people to give

(Continued on Last Page)

## WOMAN KILLED IN AUTO WRECK AT WHITEWATER

Hurled several feet, when the car in which she was riding overturned three times near Whitewater early Thursday morning, Mrs. Ruth Williams, 31, employee of a cafe in Whitewater, received a skull fracture from which she died almost instantly.

The driver of the automobile, Archie Williams, 31, who is employed by the Union Oil company at Palm Springs station, received minor injuries.

His father and an attorney arrived from Mesa, Arizona, Thursday afternoon and the latter advised Williams to withhold any statement as to how the accident had occurred, until further inquiry into the case could be made.

Coroner Ben F. White and Captain J. Raymond King, of the California Highway patrol went to Banning when notified of the fatality. Following investigation, it was announced by Coroner White that an inquest will be held this afternoon at 3 o'clock in Wiefels mortuary in Banning. Williams will attend the inquest, and according to Coroner White it is expected that he will testify.

The dead woman's husband, Burris Williams, and a minor child reside at Huntington Park. Her sister, Mrs. Ethel Evans, of Crane, Mo., is making arrangements to have the body sent to that city for burial. The husband and child will accompany it East.

## LARGE BUSINESS BLOCK FOR NORTH END OF VILLAGE

Plans have been completed and bids are to be called for the construction of a two-story business and apartment building at the southwest corner of Palm Canyon Drive and Tamarisk Road, opposite the El Paseo building. This intersection, usually referred to as the "El Paseo corner," is consequently destined to become the center of the northern business district.

The new building is to be of the Italian Renaissance type of architecture, with an interesting tower at one corner. It will be of brick, and completely fireproof throughout. The building will cover all of the frontage between the Kocher-Samson insurance building and the corner, and the lot and building will represent an investment of between \$50,000 and \$60,000.

The new structure, designed by Architects Brewster & Benedict, is to be built for Pacific Stores, Inc., a California corporation with headquarters in Los Angeles. The company also owns Tahquitz Vista Apartments, which it purchased a little more than a year ago, and then doubled it in size.

E. M. Rothman, manager of the company, stated yesterday that the new building will have eleven shops on the lower floor, and 18 or 20 apartments on the upper floor. Five of the store rooms will front on Palm Canyon Drive, and six will front on a patio opening on Tamarisk Road.

The apartments will be unique in design, each having a living room, kitchenette and bath. It is the intention to rent only to local people by the season at a reasonable rental, in order to supply a strong demand for low-priced apartments for people employed in the village.

It is expected that the structure will be ready for tenants by Christmas.

## NEW BUSINESS BLOCK BACK OF CARNELL BUILDING

Construction started this week for Kenneth Colburn on a large building at the corner of Indian avenue and Andreas Road, which will have four shops on Andreas Road opposite the Southern Sierras Power Co. Even before the foundation was completed, Miss Katherine Pollak of the Raymond Cree Agency had leased the shops.

Claire Hinkley, florist, who has been in that business here since 1930, associated with his brother, Ernest Hinkley, has taken one of the shops. He will have a modern flower shop and delivery service to all homes and hotels. With him in the same shop will be Frank Partridge, photographer.

Margaret Sarrach of Fifth Avenue, New York, will have one of the shops, featuring hosiery, handkerchiefs, lingerie, costume jewelry, toilet goods, etc. She was formerly with Kathleen Mary Quinlan of Fifth Avenue.

Manuel the Tailor, who has maintained delivery service here for several years, will have another of the shops, and Chico, beauty operator here for several years, will have a beauty parlor in another.

There will be apartments on the upper floor of the building. It is rumored that Mr. Colburn will build a number of fine cottages back of the new structure.

## NO HOPE HELD OUT FOR SUPERVISOR'S RECOVERY

J. E. McGregor of Riverside, chairman of the Riverside county board of supervisors, who has been ill since late in August, was reported yesterday as near death, with little hope held for his recovery.

Mr. McGregor is at the Riverside Community hospital where he was moved from his home two weeks ago when his condition became worse.

Guest in the home of Dr. and Mrs. John Robertson Macartney is Miss Virginia Simpson from Oil City, Pa.

## 30-ACRE CODY CORNER SOLD FOR \$50,000

One of the outstanding corners in this area, comprising a tract of 30 acres, at the junction of the Palm Canyon and Indian roads, opposite Zucca's cafe, was sold this week to a group of Los Angeles capitalists, at a purchase price reported to be \$50,000.

The property was formerly owned by Mrs. Harriet Cody, and has long been known as the Cody corner. It will be subdivided immediately by the new owners, and placed on the market by the Mason Case Co. and Robert Ransom, who made the deal. Shelton Gray is to be the tract manager.

## BULLOCK'S NEW ENLARGED SHOP OPENS TODAY

Bullock's Palm Springs Shop, one of the most beautiful buildings in town, will open tomorrow (Saturday). Manager Robert Lerch and his assistants, Ralph Graham, Mrs. Katharine Huncke, Miss Gladys Banning, Mrs. Gene Flynn and Mrs. Lerch, have been busy all week arranging the truckloads of new merchandise arriving daily.

The new shop, which has double the floor space of the former shop, was completely furnished by Bullock's interior decorating and home furnishing department, under the supervision of Lloyd Weirick. Opening between the various departments have heavy leather drapes. In fact, leather furniture predominates throughout the shop. The floors are covered with deep Moroccan rugs.

Mr. Lerch and Mr. Graham will be in the men's shop, and they will have other assistants as the season progresses. In the ladies' shop will be Mrs. Huncke, for the past 12 years with I. Magnin's of Santa Barbara, and who succeeds Miss Vivian Vincent, and Miss Banning. Mrs. Gene Flynn will be in the alteration department for ladies, and L. Friend has given up his former location and will take care of tailoring in a completely equipped room provided for him at the new Bullock's shop.

Innovations are the cosmetics and perfume corner, and the shoe alcoves for men and women. Additional stock is to be found in men's and ladies' stock rooms, where the merchandise is arranged to be inspected by patrons whenever the accession demands. Bullocks have also added a modern delivery car.

The building was constructed by Contractors Atkin & Marsh. On the upper floor are attractive bachelors' and chauffeurs' apartments, each one having a private bath.

## ERNIE FORS OPENS NEW SPORTS SHOP

Ernie Fors' new shop in the Bunker building on Palm Canyon Drive north of the theatre entrance will open tomorrow with a fine new stock of men's and ladies' sports and riding apparel and shoes, manufactured especially for the shop to meet local requirements.

Mr. Fors was manager of Phelps-Terkel Palm Springs shop here ever since the firm established a shop here. Associated with him is Leo Dudman, former manager of I. Miller's Palm Springs shop. Mr. Dudman will feature shoe styles for desert wear, made especially for his shop.

The shop has been remodeled and entrance has been opened to the theatre lobby.

Mrs. H. C. Webb of Beverly Hills entertained Mr. and Mrs. Austin Fox and Mrs. Bert Edwards with a swimming party.

### NEW GOLD STANDARD

When France devaluated the franc the other day it started something.

The United States has gone on a "new gold standard" under an agreement with Great Britain and France, designed to aid further stabilization of world currencies.

Secretary of the Treasury Henry Morgenthau, Jr., said the agreement is designed to stimulate foreign trade and stabilize international exchange by routing international money speculators.

The agreement will permit an exchange of gold for the conversion of paper currencies of the individual countries. The three nations will co-operate in establishment of exchange price of gold from day to day, Morgenthau said.

"This agreement," Morgenthau said, "represents a divorce of control of exchange markets from the few individual international speculators. Responsible governments of the people will now cooperate to assure a minimum of exchange fluctuation."

In agreeing to the proposal, Morgenthau said, the "big three" monetary powers each reserve the right to cancel it on 24 hours notice, if any of them find it adversely affects internal prosperity.

Morgenthau set the price for gold for yesterday at \$35 per fine ounce, plus one quarter of 1 per cent for handling charge. He will consult the other participants before announcing the price each day.

The new plan, Morgenthau said, differs from the old gold standard in that it will permit the export or earmarking of gold only to and between governments, instead of private business institutions and traders.

The agreement carries a step further the recent tri-party "gentlemen's agreement" between the same nations for currency equilibrium to revitalize international trade and keep international currencies on an even keel.

Trade will be promoted and money speculators routed, Morgenthau said, through the placing of the three powers' combined \$4,350,000,000 stabilization or equalization funds behind a pledge to exchange gold for their own currencies.

He said American business men were "being upset" by the currency realignments in France and other European nations in recent weeks, and that the latest step was taken to eliminate the "risk to foreign exchange from their calculations."

The United States now has \$10,979,000,000 of the world's total of \$21,000,000,000 in gold stocks. Imports during the past year of \$1,500,000,000 have endangered currencies of other nations.

Under the new plan, none of this gold may be shipped to any country except England and France. Other countries, however, may come into the agreement, and thus be permitted to participate in the exchange of gold.

### SOMETHING TO WORRY ABOUT

The Apache Indians have gone down in history as a strong race. The earlier Apaches rode ponies and ate meat and whatever the forest provided.

Now they are riding in used cars and eating starchy foods.

A press report gives this alarm:

"Apaches, once typical of Indian strength and courage, are becoming 'sissies' as a result of contact with the 'paleface' and his ways, according to the Rev. Francis M. Upiegger, veteran missionary of the San Carlos reservation, in Arizona.

"Primitive muscularity of the one-time mighty game hunters is vanishing," Mr. Upiegger told members of the Gila County Archeological society in an address at a recent meeting.

"Apaches now eat starchy foods instead of game and ape the manners and customs of the white man, he says.

"It does seem to upset our pre-conceived notions to think of Apache braves going strong for the breakfast foods."

### STATE OF THE UNION

We have millions of men eager to work, billions of dollars idle in banks, untold natural resources at our command, equipment to produce plenty of everything that everybody needs, yet we are in an economic mess. Any sound business corporation would solve and meet this simple difficulty—not haggle over the question of what director gets credit for the solution. If the board of directors are incompetent the stockholders must take a hand—or be "gyped." The job appears too big for politicians.—Brawley News.

We have a big holiday coming up this calendar month. It's Halloween and it is pretty thoroughly—and sometimes recklessly—celebrated in the United States and some parts of Europe.

## HITS AND MISSES

By HARVEY JOHNSON

This is written on Columbus Day. It is a holiday and it is well to go back a few centuries and give Chris some credit. Four hundred and forty-four years ago Columbus and party set sail in three small ships to attempt to find a new land. They bucked heavy seas and some of the sailor boys aboard threatened mutiny. Columbus probably told them to get out and walk if they didn't like the ride. Anyhow they rode the churning sea and after a lapse of time they saw before them the green shores of America. The Indians were there to greet them and feed them soup. There was no pie. Plenty of hot dogs, though.

\*\*\*

America! The new-found land which was destined to become a world power—the strongest, most vigorous nation upon the earth. By-and-by the white folks took most of the country away from the Indians without giving them a chance to get into a poker game to see who would win or lose.

\*\*\*

Columbus must have been a sturdy soul. He had a vision of a new land lying out there beyond the tempestuous seas. People scoffed at his ideas, in fine and fluent Italian tongue. Columbus' bank account was like that of many people of October 12, 1936; it was not working. If he had written a check to finance his expedition it would have come back marked "N. S. F." Nothing daunted, Columbus approached Queen Isabella for assistance. Isabella had some jewelry that wasn't phoney, so she peddled or hocked the jewels, raised money without a federal loan and outfitted the three ships.

\*\*\*

Sometimes we may not give full credit to the part Woman has played in this changing world. In the final analysis Queen Isabella discovered America. Columbus merely found it. Had Queen Isabella withheld her financial program Columbus could not have made it. Credit Isabella with having been a woman of vision. There are many gals just like that, today; they are always discovering something.

\*\*\*

King Ferdinand must have been a good scout. He fell right in with the queen's and Columbus' plan without getting a divorce. She probably told him where to head in.

\*\*\*

There was just one fly in the ointment. Lief Erikson, a Viking, no doubt discovered America long before Columbus ever set foot upon the land. That Lief made the home run first is pretty well established. After Lief had discovered America his folks asked him if it was true. And what do you suppose Lief said:

\*\*\*

"I TANK SO."

### STATE PARK COMMISSION FAVORS PROPOSITION NO. 4

Three prominent Californians have prepared the affirmative argument for Proposition Number 4 on the November 3 ballot, it was announced today by the California Recreation and Conservation Council, proponents of the measure.

They are: William E. Colby, chairman of the State Park Commission; Hartley Russell, president of the Native Sons of the Golden West, and Mrs. W. D. James, president of the Federation of Women's Clubs.

The argument drafted by the three outstanding leaders of conservation, fraternal and women's interests of the state will appear in the voters manual now being distributed.

Concerning Proposition Number 4, they stated:

"It forever prohibits tideland oil drilling. It protects the beaches for

## U. S. DISTRICT ATTORNEY TO ADDRESS VOTERS

The Hon. Pierson Hall, United States district attorney, will be the keynote speaker next Saturday evening, Oct. 17, at 7:30 o'clock in the Banning Grammar School auditorium at a Democratic rally to which everyone in San Geronio Pass is cordially invited to attend, irrespective of political party affiliations. Buddy Butler's orchestra will play entertaining musical selections throughout the program.

The Hon. Mr. Hall will talk upon the national phases of the forthcoming presidential election. He is noted as an excellent orator of unusual ability. Democratic candidates to state and national legislative posts from this district who will be introduced at this meeting will be Harry R. Sheppard, Emmett L. Singletary and Marcus W. Meairs. Each of these candidates will be permitted two minutes to talk.

Mr. Hall, who is to give the principal address, has spoken in this vicinity only once before and that was at the dedication ceremonies of the San Jacinto tunnel when the Metropolitan Water district started work on this project several years ago.

A number of local persons who heard him speak at that time state that he is an entertaining as well as a forceful orator. The dedication ceremonies occurred at Cabazon.

Mr. Hall was graduated from the University of Southern California Law school in 1916, which year he was admitted to the California bar. He was a member of the Los Angeles city council from 1925 to 1929, and has been U. S. district attorney since 1933. He is secretary of the California Democratic Central Committee. Mr. Hall is married and is a member of the Jonathan and Athletic clubs in Los Angeles. He resides in Beverly Hills.

Dance October 22

The Roosevelt Committee also announces a grand ball for the public. It will be held in Odd Fellows Hall, Banning, Thursday evening, Oct. 22.

### SOUTHLAND SLIGHTED BY STATE

Although Southern California pays more than half of the state taxes and has more than half of the state's population, it has been sadly neglected by the California state park system. Fifty of the 70 state parks are located north of San Luis Obispo.

Even Los Angeles county has only four state parks. Orange county has three: at Huntington Beach, Doheny park and San Clemente—but none of these are anything for the Chamber of Commerce to print a booklet about.

San Bernardino, Ventura, Kern, and Inyo counties have no representation at all.

It is true that the state park board does not have sufficient funds for extensive development work. But it is a growing department and, as time passes, will have increasing influence and money. Southern California should insist that the situation be equalized

by the placing of more parks south of the Tehachapi and by the improvement of those already established.—Santa Ana Journal.

"The Will Rogers" a new fast train between St. Louis and Oklahoma City, will make its inaugural run Saturday, the Frisco railroad announced at St. Louis.

## SKELETON IS OBJECT OF SEARCH BY THE DESERT CONSTABLE

Mystery still surrounds the identity of a skeleton which Bill Beech of 29 Palms says he found in an isolated portion of the desert some weeks ago. In an interview Beech stated he believed the bones to be those of a white man.

The sensational story of Beech's reputed find was published in 29 Palms and Palm Springs newspapers. The account told Beech's story and included his statement that he had reported his gruesome find to sheriff's officers and state authorities.

When informed of the report, the sheriff's officers checked their reports and found no trace of Beech's mysterious skeleton. They then telegraphed state officers and there, too, found no trace of the report.

So says a report from Riverside. Beech and J. Cones, 29 Palms constable, made a trip to point several miles from 29 Palms Tuesday in search of the skeleton. The constable slid down a huge boulder and his clothing was ripped in the accident, but he was not hurt.

Beech, who served in the U. S. Navy, will no doubt be able to show the constable where the bones are located.

### CCC ENROLLMENT HAS BEEN EXTENDED

Word has just been received that the October CCC enrollment period scheduled to close October 15 has been extended to, and including October 31, 1936. Young men 17 to 28 years of age inclusive representing families on public relief or eligible for public relief are eligible for enrollment.

Not only does the young man receive six months or more steady employment but an enrollment embraces any one of over 100 educational and vocational courses. Among the courses now being taught are: Bookkeeping, typing, shorthand, photography, elementary placer mining, elementary aeronautics, elementary law, Diesel engine mechanics, automotive mechanics, jack-hammer operation, forestry and others, any of which when completed will qualify a young man for a far better position than any he might have obtained before CCC enrollment. The state office has actual records of hundreds of instances wherein young men have obtained fine positions because of training received in the CCC.

Further information can be obtained by calling on J. W. Fitzpatrick, located at the Court House, Riverside, who is the selected agent for Riverside county.

**YOUR GARDEN IN THE DESERT**  
By  
**WILLIAM C. MUNCHOFF**  
Landscape Architect

A partial list of plant material was given in last week's article. If the following rules are observed, satisfactory results will be obtained.

Dig the hole for the plant about three times the size of the container in which the plant is delivered. The hole should be deep enough to allow planting the shrub or tree from two to four inches deeper than it was planted in the container. Cut the can carefully and remove the plant without breaking the ball of earth. Surround this ball of dirt with a mulch of soil mixed with peat moss or leaf mold, and if neither one can be obtained, cow manure will answer the purpose if used in correct proportions. Water well so that no airpockets may form to obstruct the development and functioning of the new and tender feed roots.

Do not allow the shrub to become dry during the time it reestablishes itself. The ground should be moist at least five inches below the roots and always kept in that condition. Good drainage is important. All plants should be regularly fed in order to produce health growth, large and profuse flowers.

Experience has proven that it is better to fertilize all bedding plants after they have rooted. This is particularly true if commercial fertilizers are used.

### PARADOX

It is the most astonishing paradox that people, according to the survey, are living 10 years longer, when, what with droughts, depressions and the like, there would seem to be so much less to live for.—Hartford Courant.

Phone Desert Sun, 3594

FRED ASTAIRE

### NEW ASTAIRE-ROGERS HIT COMING TO PALM SPRINGS

Sparkling with scores of novel features that make it one of the most entertaining film musicals of recent years, "Swing Time," at the Palm Springs Theatre tonight (Friday) and Saturday, marks the fifth co-starring triumph of the famous Fred Astaire-Ginger Rogers duo.

A sensational solo dance in black-face by Astaire, the presentation of the newest ballroom rage, the "Swing Waltz," some of the most gorgeous settings ever shown on the screen, a star-spangled supporting cast and a brand-new type of story for the wing-footed team and seven of the catchiest tunes of Jerome Kern's career, are among the highlights of this hilarious musical romance.

Love affairs and complications feature the story plot, with Astaire endeavoring to rid himself of a troublesome fiancée so he can marry Miss Rogers, and at the same time trying to discourage a conceited orchestra leader who also has matrimonial designs on her.

Victor Moore and Helen Broderick, teamed together as one of the funniest comedy duos ever to reach the screen, head the supporting cast as a pair of well-meaning but often embarrassing match-makers, who innocently provide many of the complications, and much of the hilarity of the film. Eric Blore, Harrigan, Pierre Watkin, and Landers

Stevens also have prominent roles in the picture.

A glittering aerial night-club of mirrors and chromium, moored to the tower of Manhattan's tallest skyscraper, forms one of the breath-taking settings of the production.

Another unusual night-club setting, an arresting expanse of the snow-clad Adirondacks in midwinter, a theatre, a modernistic dancing academy and several apartments and hotel suites comprise the rest of the backgrounds in which the fast and tuneful action of the picture takes place.

The "Swing Waltz," said to be the first real innovation in waltzing since its inception, is performed as one of

### TWO MORE VARIETIES OF DUCKS PROTECTED

Duck hunters of this community, and in fact the whole United States must hold their trigger finger in check when they sight canvasback and red-head ducks. New federal regulations on waterfowl hunting have added these ducks and Atlantic brant to the list of migratory waterfowl that cannot be killed legally at any time. The United States Biological Survey says these birds have suffered severe setbacks in recent years and are too few in number to be hunted this season.

The three dancing numbers of Astaire and Miss Rogers.

## 1937 BUICK TO BE HERE TOMORROW

The new Buick for 1937 will be formally presented to the public next Saturday in the showroom of the Desert Inn Garage. Always an important event is preceded by unusual interest because of reports of striking style changes.

High-speed activities at both the big Buick factory in Flint, Michigan, and in the local organization have forecast special preparations for launching the 1937 season. Buick production already has attained the highest output to be reached this early in a new model year.

"In our experience with Buick, we have never had so many pre-showing indications of a big season," said George B. Roberson. "In the 1936 season Buick sales in Southern California increased 428 per cent. We will further increase that gain in 1937. In fact, we are preparing for the biggest volume year we ever had. The rush of advance orders and all the other signs justify this optimistic belief."

Meantime, last week there ended on the Pacific coast one of the most spectacular demonstrations in the history of the automobile. Departing from the Buick factory in rapid rotation, 410 new 1937 Buicks were driven across the country by Buick men returning from the big factory convention. Of the total 175 arrived in Southern California to immediately go into regular demonstration in the Howard and dealer establishments.

This "breaking-in" plan was originated with the 1936 models, 211 of which were driven to the coast with an average of 51.2 miles per hour and, going directly into demonstration service, were used in this capacity throughout the season. This is a marked deviation from the former procedure of placing new cars in demonstration with only a limited amount of driving over Los Angeles pavement.

While the full compilations of all the coast cars has not been completed, it is known that the average daily mileage was high with a decrease in fuel consumption under last year. This would indicate that Buick engineers have been giving thought to fuel economy as well as increased performance.

The Araby-Palm Springs Stable, which has been open since October 1, is now well organized and in shape for Palm Springs' busiest season. There are twenty-five horses at present and the stall space has been increased to fifty. This year the management is going to feature children's classes and jumping lessons in the instruction ring. Guides and instructors are available. A new feature this year is a pony cart for the kiddies, which should prove to be popular. They also have a sulky for driving horses. The Araby-Palm Springs Stable is operated by Jean F. Moore and G. Schickly, and Miss Mary White is in charge.

Mrs. E. M. Abel and her daughter, Margaret, have returned from Lake Tahoe, where they operated the Vienna Sport Shop, and have opened their shop of the same name in the Bunker building.

Phone The Desert Sun, 3594.

## DEMOCRATS OF VILLAGE HONOR HARRY SHEPPARD

Local Democrats held a dinner meeting honoring Harry R. Sheppard, candidate for Congress, at Hotel del Tahquitz Monday evening. There was a large turn-out, and the candidate was greeted enthusiastically. He made a stirring address, and pledged his unqualified support for President Roosevelt.

Charles G. Chamberlain was chosen chairman of the local Democratic group, and R. D. Murray, secretary. The following telegram was drafted and sent to the national chairman: Hon. James A. Farley, Democratic Headquarters, Biltmore Hotel, New York City.

At a dinner tendered Harry R. Sheppard, next congressman from this district, at Hotel del Tahquitz, all present pledged full loyalty and support to President Roosevelt and entire Democratic ticket. Palm Springs and environs are unquestionably for Roosevelt and we shall carry on the work throughout Riverside county. For the first time in history Riverside County Democratic registrations exceeds all other parties.

G. C. Chamberlain, Secretary.  
R. D. Murray, Secretary.

"Roosevelt will carry California by 750,000 votes."

With this prediction, Fred C. Schweitzer, chairman of the Riverside County Democratic Central Committee, today declared that a thorough survey of the state had convinced him that the electoral votes of this state were surely in the Roosevelt column.

"Not a bank failure in the entire United States has been reported in more than a year," Mr. Schweitzer said. "Deposits are insured; investors and depositors are safeguarded; Riverside has broken all records in postal business; all records have fallen for new construction in the city and county. No citizen can honestly say that the present administration has not led us from the woods where it found us."

"With the Republicans we have no quarrel. But with the reactionary element within the party, seeking to guide the footsteps of the nation again into the morass of depression we have a decided issue. If there was such a thing as Republican prosperity, then there most assuredly was such a thing as Hoover disaster. The man who takes credit for the sunshine, must be prepared to shoulder the blame for the rain."

Mr. Schweitzer declared that the

quarrel of the Democratic and Republican parties no longer was bound by party lines, but had divided itself into reactionary and liberal camps. He said he was satisfied with the outlook in Riverside county.

"I am confident Riverside county will be found in the column of enlightened and progressive thought on Nov. 3," he said.

Mr. and Mrs. Johnny Vance, who were married in Colorado 10 days ago, have returned to the Deep Well Guest Ranch, where Mr. Vance will again have charge of the stables, and Mrs. Vance, formerly Miss Marie Owens, will resume her duties in the dining room. They left again yesterday for a week's extension of their honeymoon at San Diego.

## TAX DELINQUENCY CUT 50 PER CENT IN THIS COUNTY

Riverside county tax delinquencies have been cut more than 50 per cent. The worst year in the history of the county was in 1932, according to County Auditor Ray Hicks. In 1932 tax delinquencies totaled \$785,300.85 against total county charges of \$3,528,123. The percentage of delinquency in that black year was 22.55 per cent, Mr. Hicks declared.

Evidencing complete recovery and a return to better than normal in Riverside county, the year 1935-36 showed tax delinquencies of 10.54 per cent. This figure is based on total charges of \$2,974,282.35 and a tax delinquency of \$313,343.81.

"In the past two years," Mr. Hicks declared "More than \$350,000 in tax delinquencies were liquidated by property owners, taking advantage of state laws that permitted redemption of property without penalty. 1932 was the worst year in the history of the county and this year already shows it will rank among the best, with a delinquency lower than the boom years of 1925, 1926 and 1927."

Redemption of property, Mr. Hicks pointed out, despite state laws making it easy, would have been impossible if the income of property owners had not been materially augmented from outside sources, from vastly improved business conditions, and from a greatly increased earning power due to more employment and better times.

County Tax Collector C. R. Stibbens also announced a slash in the Riverside school district tax rate. Riverside city taxes are cut from \$1.14 to \$1.06, school taxes from \$1.63 to \$1.60 and county taxes from \$1.52 to \$1.40. There is no increase in assessed valuation.

## DR. DON RUSH OPENS DENTAL OFFICES IN THE CARNELL BUILDING

Dr. Don Rush, dentist of Los Angeles, has opened dental offices in Suite 1, on the upper floor of the Carnell building. The office is 100 per cent Ritter equipped, new Ritter X-ray, sterilizer, dental unit, chair, and other equipment having just been installed.

Dr. Rush is a graduate of the University of Southern California dental college. After graduating he practiced four years in Arizona and 15 years in Los Angeles.

## NATIONAL PARK MIGHT SLOW UP WORK OF MINING

Establishment of the Joshua Tree National Monument by presidential proclamation sets aside an area of 825,430 acres in which no new mining claims can be located.

The department of national resources in pointing out that this area of some 1290 square miles contains the principal mineral sections of Riverside county expresses the opinion the terms of the proclamation should be corrected.

"The same situation ensued several years ago when the Death Valley National Monument was created and was subsequently corrected by a congressional amendment," Director George Nordenholt said.

"While the terms of this proclamation recognize valid existing claims and to that extent will not prevent continued operation of any more new mining claims or claims covering the extension of ore bodies now worked in existing claims, unless the suggested amendment is made," he said, "the nation will lose much by the retarded development of the valuable mineral resources."

Workmen at the Plaza this week excavated an old Mexican mixing bowl. It is believed the bowl is very old, but its origin and how it got there is unknown.

## SEARCH FOR HIT-RUN DRIVER CONTINUES; PEDESTRIAN KILLED

Edgar Barton Glaucque, aged 56 years, of the Glen Avon district, near Riverside, was instantly killed Saturday night at 7:30 o'clock, by a hit-and-run driver at Cabazon.

A truck carrying Mr. Glaucque and Clyde Simpson, also of the Glen Avon section, had broken down earlier in the evening a short distance east of Cabazon.

Mr. Glaucque visited a cafe on the opposite side of the highway, it was reported, and as he was recrossing to join Mr. Simpson he was struck by a motorist who sped away. Mr. Glaucque's body was hurled a considerable distance, by the impact.

He leaves a widow, two sons, and a daughter.

Ray Dillon and Gene Henderson of the State Motor Patrol investigated the case.

An hour after the fatal accident occurred Glaucque's son, 15, came to the Banning police station and inquired whether the police had heard of any wreck. He was informed that a man named Glaucque was killed at Cabazon. The boy said "That was my father."

It was his first information as to the identity of the dead man.

The remains are at Wiefels mortuary where an inquest will be held.

Search continues for the hit-and-run driver whose car killed the victim.

## 10 CANDIDATES NAMES ON BALLOT

Ten names will be on the November 3 general election ballot in Riverside county besides those of the electors of the parties in the Presidential voting, County Clerk D. G. Clayton has announced.

Voters will cast their ballots for one of three candidates for Congress, for one or two candidates in each of the senate and assembly contests, for or against a supreme court justice, and for one of two candidates in the third supervisorial district race.

The three congressional candidates are Congressman Sam L. Collins, Republican; Harry R. Sheppard, Democrat, and Charles McLauchlan, Communist.

Candidates in the 27th senatorial district are John Phillips, Republican; and Marcus Meairs, Democrat.

In the 76th assembly district contests are Nelson S. Dilworth, Republican, and Emmett Singletary, Democrat.

Third supervisorial district voters, all residing in the city of Riverside, will cast ballots for either J. E. McGregor, incumbent, or Walter V. Pittman.

For the first time the county voters also will vote under the new state judiciary election plan. The name of Douglas L. Edmonds, associate justice of the supreme court will appear on the ballot with the question, "Shall Douglas L. Edmonds be elected to the office of associate justice of the supreme court." The voter will mark an "X" in the "yes" or "no" square. If the judge is not re-elected "on his record" the governor appoints someone to succeed him.

Besides the Presidential and local

## CANAL TO COACHELLA VALLEY

An engineer of the U. S. reclamation bureau has arrived at Indio and has begun preliminary surveys on the Coachella valley leg of the All-American canal. A staff of several will assemble there some time next month.

Coachellans see in this hopeful sign that the big ditch will soon be under construction. Of course, there is a great deal yet to do. It will take the engineers several months to complete their surveys and determine somewhere near the actual cost of the canal. Then the matter of financing becomes foremost.

Maybe, if work is speeded up, the Coachella branch can be made ready to deliver water by the time the new All-American canal is opened to receive the flow of water from the Colorado river. The reclamation department has said the canal will not be functioning as a complete unit until 1939.

It would be a fine thing if the entire system could be finished at the same time. Perhaps if the Coachella Water district continues to insist on speed for the Coachella lateral canal, dirt will be flying on this line before another year. We hope so, and everyone in the Imperial irrigation district feels the same way about it. With the canals in operation and the power developments that are to go with it, the last of the great Colorado river projects will be finished. Construction of Boulder Dam was the beginning of a comprehensive program which has led to the building of the Colorado River aqueduct, All-American canal and insuring abundance of water for irrigation and domestic purposes and immunity from flood and drought in the future. Coachella has title to a share of the Colorado river water. Until the canal is built up that way ranchers cannot cash in on it. It is good to see the engineers getting the work started.—Brawley News.

election contests, the ballots will also carry the 24 proposed constitutional amendments and initiative measures.

## ABSENTEE VOTES TO BE OBTAINED BEFORE OCT. 29

The 15-day period in which absentee ballots for the Nov. 3 general election may be obtained from the county clerk's office opened Wednesday. Applications must be made to the clerk on or before October 29.

Registered voters who will be out of their voting precincts or physically unable to go to the polling places on Nov. 3 are entitled to apply for the special ballots.

Persons living too far from the court house to apply in person may make the application by mail. County Clerk D. G. Clayton said.

As soon as ballots are available they may be voted by persons applying in person to the county clerk's office for absentee ballots.

Voters taking the ballots with them must stamp them in the presence of a notary public on or before election day and mail them back to the clerk. Notary publics are prohibited by law from charging for this service.

The absentee ballots must reach the clerk not later than Nov. 9 when the official canvass begins.

Since last May, at the rate of about 100 cars per month, 10½-foot steel pipes have been moved via Pacific Electric freight cars from Los Angeles steel plants to Chemawa Siding, near Riverside, where it is being laid as a part of the distributing system of the great water and power project of the Metropolitan Water district. In all 30,000 tons of this huge pipe is to be transported for the construction of the "largest man-made river in the world."

When completed the ten miles of steel line will be a part of a long siphon from Cajalco reservoir, the terminal reservoir of the giant Colorado River aqueduct, to a summit in the Jurupa Hills, south of Fontana. From the intake works on the Colorado river, near Parker Dam, the main channel of this concrete and steel river bed travels west over the desert and through mountains for 242 miles to the Cajalco reservoir.

## DESERT SUN BEAMS

Residents for a fortnight here are Mrs. Paul A. Medearis (Betty Burns) of Beverly Hills, accompanied by Miss Peggy Barger and Miss Billie Davis of Los Angeles.

Stanley R. Lewis of Pasadena is returning to town Monday after having been here ten days letting contracts for the construction of his new home in Palm Canyon Estates.

Arriving today is Mrs. Claire MacGowin Winter of Los Angeles with her two boys, Frank and Peter. Mrs. Winter just returned from abroad after a three months trip to Italy, France and Germany.

## EL MIRADOR GARAGE IS BEING REMODELED

El Mirador Garage is receiving extensive improvements. The southwest corner is being converted into a large showroom where the new Packard models will be on display. A 16-foot show window is being put in the front of the building so that the cars can be viewed from the street. The entire interior of the garage has been painted, chauffeurs' quarters upstairs have been improved, the space in front of the garage will be paved and the business office will be enclosed in glass. During the summer four new computing pumps were installed.

## TRANSIENTS IN GREAT NUMBERS HEADING WEST

With drought-stricken states adding new migrations to California it is apparent that this state will be besieged by thousands of "settlers" this coming winter. Many of these people would not come had it not been for adversity in their home states.

"Sorry, you have a cold, we can't let you come into California."

There's no such law as yet but it's no secret that interests close to the state administration have been delving into the constitutionality of a statute which would permit the state to bar undesirable transients, ostensibly upon the ground of protecting public health.

Back of it all is the terrific problem created by the influx of the penniless.

Los Angeles county bears the brunt of this burden, but it constitutes an acute situation during winter months throughout the southern part of the state and is felt to a lesser extent in northern areas.

Last session a bill introduced by Assemblyman Redwine and Jones to bar the entry of "paupers and vagabonds" passed the house and made progress in the senate and then was abandoned when the federal authorities, sub rosa, made representations against it and agreed to help financially in the care of the transient destitute and to provide funds for returning great numbers of them to their homes in other states.

The bill authorized and directed the governor to set up a border force to guard the state against illegal entry.

The measure bluntly stated: "Section 2—All paupers and vagabonds, indigent persons are hereby prohibited from entering the state of California."

Some ranking lawyers passed the opinion the law would stand a constitutional test. There were others who seriously doubted it.

The senate thought enough of it to amend it three times and had it ready for the final vote when the word came from Washington. California senators had discussed the matter with those high in the national administration.

Federal co-operation was forthcoming as promised and this help continued for some time. Then, state officials say, federal enthusiasm began to lag.

After seasonal improvement set in, the campaign of lightening California's transient load was practically abandoned.

Now it is becoming serious again. Every freight train brings in from a dozen to several score transients. There are two federal-state camps and a number of state camps but they can't begin to care for the thousands who have drifted in. Additional hordes came by trails and highways.

Governor Merriam has declined to say whether he is for or against a revival of the Redwine-Jones bill but he did reveal he has been consulted, and it has been indicated a new measure, if there is one, probably would be dressed up as a health protection measure.

One guess is as good as another as to whether adequate financial aid from the government would again head off enactment of a law to cope with the problem.

Three lawyers of standing are said to have given an opinion a state has the right to regulate entrance in the interest of public health.

There is a disposition at the capitol to proceed carefully and to give some consideration to what the reaction would be in other states. Some outside sources haven't taken any too kindly even to the state's plant quarantine set-up. The mayor of Portland and several others, from time to time have offered some rather caustic criticism.

Supporters of the movement believe if other states realized California's difficulties, there would be a more sympathetic understanding.

There are still others who take a harder boiled attitude and maintain California is entitled to protect itself from possible bankruptcy, petty crime and the demoralizing economic consequences of the invasion, regardless of what others who, do not live here think. Some of the adjacent states, they say, are and have been deliberately shooting the vagrants this way—encouraging them to come to California even to the extent of providing gasoline.

## ELECTION BOARDS NAMED FOR BIG EVENT OF NOV. 3

The board of supervisors appointed election boards for the general election which will be held November 3 between the hours of 6 a. m. and 7 p. m.

Following is the list of vote counters for this locality:

**Palm Springs Voting Precinct No. 1**  
Polling Place: School House.  
Inspector, Henrietta Parker.  
Judge, Orville Richardson.  
Judge, Agnete Hansen.  
Clerk, Louise Klug.  
Clerk, Grace Jones.  
Clerk, Herbert Samson.

**Palm Springs Voting Precinct No. 2**  
Polling Place: Marion MacCartan Office.

Inspector, Clarence L. Templeton.  
Judge, Thos. S. Douglas.  
Judge, Bertha Hamsher.  
Clerk, Cornelius Gepfert.  
Clerk, Alpha May Larrison.  
Judge, Stephen Janus.

**Garnet Voting Precinct**  
Polling Place: Anna Tipton Residence.

Inspector, John W. Riley.  
Judge, Wm. D. Price.  
Clerk, C. S. Tipton.  
Clerk, Michael Driscoll.

**Cabazon Voting Precinct**  
Polling Place: School House.  
Inspector, Otto C. Meeks.

Judge, Benjamin Van Duine.  
Judge, Ellena M. Dooley.  
Clerk, Hazel Koger.  
Clerk, Adeline Bloeser.  
Clerk, Bessie Watson.

### CALIFORNIA REAL ESTATE REGAINS DEPRESSION LOSS

California real estate securities have regained a large portion of their depression losses, it was indicated in a report of the state division of real estate at Sacramento.

"Information at present indicates a steady and substantial advance in the market price of real estate bonds," the division market said. "The income and market price of real estate securities are directly dependent upon the net income derived from the properties securing real estate mortgage bonds."

"A careful analysis of the trends in sales occupancy and space rates is of prime importance in considering the real estate bond situation."

"A survey discloses a truly remarkable increase in these factors. As a result of these improvements in conditions it is believed that real estate securities have regained a large portion of their depression losses."

Another indication of improved conditions was seen in the report that a total of 291 subdivision projects had been launched during the first seven months of the year as compared with 91 projects for a comparable period in 1935, according to the division report.

300 A. D.  
(Indio Date Palm)  
Writing about Rome of the third century A. D., a famous American historian said:

"Staggering under his crushing burden of taxes, in a state which was practically bankrupt, the citizen of every class had now become a mere cog in the vast machinery of the government. He had no other function than to toil for the state, which exacted so much of the fruit of his labor that he was fortunate if it proved barely possible for him to survive on what was left."

"The century of revolution which ended in the despotic reorganization by Diocletian completely destroyed the creative ability of ancient men in art and literature, as it likewise crushed all progress in business affairs. Insofar as the ancient world was one of progress and civilization, its history was ended with the ascension of Diocletian."

Thus, from the pages of history can be recorded the disastrous consequences of heavy burdens of taxation.

1935  
The Goodyear Rubber Company in 1935 paid \$16,988,624 in taxes and produced 15,799,291 tires, with a net profit of 34 cents a tire, as against a tax bill of \$1.07 a tire. Many more examples of this nature could be given, but these suffice to illustrate the point.

### CABAZON THREATENED BY BRUSH FIRE, MONDAY

A brush fire at Cabazon threatened destruction of part of the town Monday evening. Valiant work was done by fire departments and the blaze was stopped with the "aid" of a road serving as a firebreak.

### BOY SCOUT FALL CAMPOREE AT CAMP EMERSON STARTS SATURDAY

Place—Camp Emerson. Date—Oct. 17-18. Time—1:00 p. m. Sat., 3:00 p. m. Sun.

Order of Program—Saturday, Oct. 17—A.M.—10:30-12:45 — Registration. Preparing Camp. Eating Noon Lunch. (All troops are urged to be in Camp by 10:30 and to bring prepared noon lunch).

12:45-1:00—Special announcements regarding Camporee.

P. M.—1:00-4:30—Camporee Events. 4:30-6:30—Flag Ceremony and Mess period. 7:00-9:00—Campfire. 9:30—Taps.

Sunday, Oct. 18—A. M.—6:30—Reveille. 7:00-7:15—Flag Ceremony. 7:15 to 8:00—Breakfast. 8:00-8:45—Clean-up. 8:45-9:15—Non-sectarian Religious Services. 9:15-11:30 — Camporee Events. 11:30-1:00—Mess Period.

P. M.—1:00-2:30—Camp Inspection and Camporee Events. 2:30-3:00—Presentation of Awards. 3:00—Dismissal. Special Regulations—All contestants must be registered Scouts in good standing. No Scout who has passed his 18th birthday may be entered in any event. No Troop may enter more than one team in any one event.

Awards—A.—Ribbons will be awarded in each event to the Troops winning 1st, 2nd, and 3rd places.

B.—A permanent plaque will be awarded the Troop winning the greatest number of points in the Camporee.

C.—The winning Troop will be awarded the Radford Memorial Trophy, to be retained for one year.

Scoring—5 points will be awarded for 1st place, 3 points for second place, 1 point for 3rd place in each event.

Judging—Decisions of the Judges will be final. No coaching shall be allowed during progress of any event. Violation of this rule may result in disqualification of the team.

Equipment—Unless specifically stated otherwise, each team must furnish their own equipment for each event.

### ALL-YEAR CLUB GIVES OUT "PICTURE MAPS"

Nearly two hundred thousand of the All-Year Club's "picture maps" have been mailed to prospective tourists or presented to motor parties of travelers when they arrived at the border of the state.

This was revealed by George Schindhelm, treasurer of the community's non-profit tourist bureau, who declared the way has been found to stimulate the desire to visit Southern California, thus adding to the year's income from the tourist business.

When presented to motor parties, he said, it causes them to remain longer in the southern part of the state, with a considerably larger percentage of their money than they had planned going into circulation here.

The map is notable for a huge "picture" of California, with interesting points to visit represented in picture form. On the reverse side is a copy of the Department of Public Works, highway division, map, with scenic spots keyed by a number system to notes on the margin.

When extended, the cartographic device is more than a yard in length.

## Economic Highlights

Biggest international economic news in many a moon was the announcement that France had finally left the gold standard and devalued the franc, and that England, the United States and France were at last to cooperate in seeking to stabilize currencies.

There are various ways of looking at France's long anticipated move. Critics say that currency devaluation is simply a dubious scheme for making one dollar into two—that it is simply another word for inflation. England started it, five years ago, and was followed by the United States three years ago, when we changed the fixed price of gold from \$22 to about \$35 an ounce.

However, the great bulk of commentators feel that France's action and the three-power stabilization compact are good things. Even such strong anti-New Dealers as Frank Kent and Mark Sullivan have given the President credit for authorizing the agreement. The reasons for such approval are two fold: It is believed that stabilized international currencies will be a spur to lagging world trade and will better the chance for keeping world peace.

There are three main currency units in the world—the franc, the pound, and the dollar. Other currencies hinge upon one or the other of these—that is the purchasing power of the lire, the mark and other currencies is dependent upon what happens to the currencies of the three great financial powers, with their tremendous gold reserves.

As a result, if the franc, the pound and the dollar are stabilized so that their purchasing power in relation to each other does not change from time to time, as it has in the past, the purchasing power of other currencies will likewise remain constant.

The effect of this on the world trade situation is obvious. When currencies move up and down in their relation to each other, normal trade is impossible, for the reason that a country cannot carry on import and export business when it doesn't know what a dollar will buy tomorrow in England, or what a franc will buy next week in the United States. All during depression the major currencies have been subjected to great fluctuation—and the upshot is that international trade has stayed at a very low level, while domestic trade in most countries has been expanding and approaching "normal" levels.

The effect of currency stabilization on world peace, in turn, is equally obvious. Cordell Hull once said that economic contentment is the best preventative of war. That is, countries which are enjoying normal and profitable commercial relations with each other are much less disposed to resort to military action than countries which are not. No man willingly cuts the throat of a good customer—and what is true of individuals and industries is largely true of nations.

No one, of course, expects that currency stabilization will immediately boom world trade, and send the nations' merchant marines scuttling back and forth across the ocean under forced draft to make deliveries. But in view of practically all the experts, the move will stimulate trade, which in turn will stimulate domestic business, which in turn may cast some rays of peaceful light into the shadow of war.

One dramatic, if relatively unimportant aspect of the agreement was Russia's dumping of a million pounds sterling on the New York market 24 hours later. Secretary of the Treasury Morgenthau at once purchased this out of the \$2,000,000,000 stabilization fund, intimating that Russia was attempting to wreck the three-power compact and make stabilization impossible. Most observers are of the opinion that Mr. Morgenthau exaggerated—they say that Russia certainly knows that a million pounds, which is a little less than \$5,000,000, isn't enough to even faintly embarrass the three powers.

Fall is witnessing the expected upping of production in many industries.

Big element, as in the past, is motors. Car builders have their new models all set for the market—some of them may be out by the time this is read. Production schedules, according to Business Week, call for 1,000,000 units during the next quarter.

Steel recently touched a high for this year, continued upward.

The employment aspect likewise showed betterment. In manufacturing industries, total employment has at least reached the fall 1930 level, is above a year ago.

Prices continue their up-trend, but slowly. Biggest jump has been in food costs. Manufactured goods have changed little since summer.

## RAMONA LIVES AND LOVES AGAIN!

LORETTA YOUNG AND DON AMECHE

The current outstanding event in the film world is the presentation of Helen Hunt Jackson's immortal love idyll, "Ramona," produced by 20th Century-Fox in the new perfected Technicolor coming Sunday and Monday to the Palm Springs Theatre. The cast of thousands featuring Loretta Young and Don Ameche, includes such brilliant players as Kent Taylor, Pauline Frederick, Jane Darwell, Katherine De Mille, Victor Kilian and John Carradine.

As long as two years ago, preparations were begun for the picturization of this beautiful love story. Darryl F. Zanuck, Twentieth Century-Fox studio production chief, spent nearly an entire year in search of the perfect Ramona. After covering carefully his own contract list and combing the entire field of free-lance players and "unknowns," he felt assured that he had found the right Ramona when he selected Loretta Young.

Scores of eligible players were tested for the role of Alessandro, Ramona's great love, and it finally went to Don Ameche. This rising young actor appeared to have all the qualifications necessary to play the part. He has a splendid voice, as has been attested by his previous success on the radio. He is six feet tall and decidedly the athletic type. His work on the

screen in "Ramona" completely justifies his selection for the part.

Zanuck and Sol M. Wurtzel, executive producer, conferred with Technicolor photographer William Skall and other members of the organization's color staff and decided to "shoot" "Ramona" during the summer season of the year, thus utilizing the natural rainbow beauty of California as a setting.

"Ramona" was filmed in the beautiful San Jacinto mountain meadow land of Southern California, the actual spots where Ramona and Alessandro lived and loved many years ago, as described in the story. The main location was a 55,000-acre ranch in the Mesa Grande area, about 140 miles southeast of Los Angeles. The site is an almost endless succession of green expanses rolling toward the dusty purple of the far-off mountains, every shade and tint defined in the clear, dry air, lending itself perfectly to the new Technicolor photography.

The largest of several groups of settings built in various locations was the huge Moreno hacienda, where Ramona first met Alessandro. This vast outdoor "set" included barns, sheep corrals and other typical ranch structures covering six entire acres. Altogether, twelve weeks were spent on location in filming "Ramona."

## WHITEWATER TO BE SITE OF NEW INDUSTRY; FACTORY IS PLANNED

The Mortarless Unit Construction Co. of Los Angeles has purchased a site from A. J. Warner, near the Three Musketeers at the junction of Highway 99 and Palm Springs road—on the north side of the main highway.

The corporation will have a factory for mortarless tile in operation in thirty days, according to information given by Charles Dean of Los Angeles.

A missionary to the South Sea Islands reports that it is becoming increasingly difficult to keep the native women in clothing. Same over here, brother.—Washington Post.

## A LESSON TO OTHERS

What the world is observing in Spain today is what happens when the people of a country substitute bullets

for ballots in determining public policies. What has happened in Spain ought to serve as a lesson to the people of every other country.—Houston Post.

## VOTERS: You Can and Should Kill This Tax

Defeated once, the old Sales Tax on Food is back again in disguise... along with **added taxes** on other necessities of life

On the November ballot, it masquerades as a "Retail Store License"—Proposition #22.

But brought down to cases, it is a hidden sales tax on food and other necessities. A tax for the consumer to pay in **higher prices**.

It charges individual stores \$1.00 a year for the right to do business. It taxes chain stores \$500.00 for each store over nine. **But it is you who will really pay.**

For, as the U.S. Federal Trade Commission states...

**"If the ability to undersell, based on greater efficiency or on elimination of credit and delivery cost, is destroyed by taxation, it is the consuming public which will really pay the tax and not the chain."**

Why? Because four out of five chain stores do not make enough profit to cover the tax.

For chain stores operate on a small

profit. They eliminate middlemen's profits and unnecessary in-between expenses. The savings they make by operating efficiently are passed on to you in prices 10% below the average. The Harvard (University) School of Business Research states these to be the facts.

Thus chain stores must raise their prices or go out of business. If they raise prices, you will pay the tax.

If they go out of business, their competitors can raise prices even more—and you will pay.

Further, this tax is admittedly **not** for revenue purposes. It is a subsidy for wasteful business methods—at your expense.

So if you think that chain store competition helps to keep all prices in line with your pocketbook—if you are opposed to higher taxes on foods and other necessities—**vote NO and keep prices low.**

For no matter what name they give it...no matter how cleverly they disguise it...**22 is a tax on you—VOTE NO!**

## 22 IS A TAX ON YOU—VOTE NO!

RETAIL STORE LICENSE		Referendum against act of Legislature (Chapter 849, Statutes 1935) requiring every person or organization owning, operating or controlling one or more stores, wherein merchandise is sold at retail, obtain annual State license; prescribing fifty cents application fee for each store and one dollar license fee for one store, increasing license fee progressively for second and additional stores to five hundred dollars for each store over nine; excepting filling stations, ice distributing establishments, restaurant facilities of common carriers, newspaper offices, stores wherein sales are incidental to rendering personal service, theatres and motion picture houses. **OLD TIME BASE  
BALL MANAGER  
NOW LIVES HERE**

Jim Morley, owner of the first baseball club in Los Angeles, pioneer pitcher and former Pacific coast pocket billiard champion, is a resident now at Casa Palmeras Apartments.

Jim Morley is known to all the old baseball and billiard fans of the nation. His father was a famous baseball pitcher, and pitched the first curved ball. Jim owned his first baseball team in Los Angeles in 1887, when he managed the famous Tufts-Lyons team, that won more consecutive games than any other team on the coast. Leo Youngworth, now famous political leader, was first baseman on his team.

He started the first Los Angeles league baseball club, the Seraphs of the California State League. When Portland and Seattle came into the league, it became the Pacific Coast League, and the Los Angeles Club later became the Angels.

Morley isn't fully satisfied with the way modern baseball is played. "Why, I've seen players of opposing teams shake hands with each other. When I played ball we wouldn't speak to opponents, and we played so hard to win, that oftentimes fights resulted," he said when interviewed by a Desert Sun reporter. "I saw a catcher recently take off his mask and stop to shake hands with the man who came up to bat. I would have canned a catcher of mine who would have done that."

During all the years that Morley had a baseball team, he never had a losing year.

When his baseball days were ended, he went into the cafe business. He operated the famous Ship Cafe of Venice in 1909 and 1910, then the old Oakwood of Arcadia, the grand old Redondo Hotel that equaled the Coronado in fame, the Portola Cafe of Los Angeles, the King George Hotel of Ocean Park, and others.

Among the famous motion picture folk seen at the Desert Garden Date Shop were Astrid Allwyn, Irene Purcell, Damien O'Flynn, and the two lovely children of Mr. and Mrs. Robert Burns, Sandra and Ronald. Sandra is nearly three years old, and Ronald 14 months. He had the time of his life toddling about the room, inspecting all the interesting packages and colored objects of art. Mrs. Burns is known as Gracie Allen on the radio and screen.

**CHUCK ABBOTT BROILS  
3000 STEAKS IN 28  
STATES THIS SEASON**

"Chuck Abbott, cowboy host, and his cowboys from the world-famous Desert Inn of Palm Springs" and phrases similar to the one just quoted, were carried in profusely illustrated articles in metropolitan newspapers from California to Maine this summer, describing picnics and outdoor moonlight parties of some of the nation's most exclusive country clubs.

Chuck Abbott, accompanied by Johnny Boyle and Dusty Adams, cowboy singers, left here on June 8 to fill engagements made previously with exclusive country clubs and prominent families who desired to entertain their friends in true Western style. They traveled more than 14,000 miles in 28 states, and broiled more than 3000 steaks while on the tour.

Practically all of the parties were held around a campfire and all the guests came dressed in their old clothes or in Western garments. Chuck Abbott broiled thick juicy steaks, and he and his assistants sang the songs of the range.

At Cleveland on July 18 they entertained the Shaker Heights Country Club, with 700 present, and Chuck and his assistants had to broil that many steaks. The Cleveland Plain Dealer devoted most of a page to pictures and a description of the "Western" party put on by the cowboys from Palm Springs.

At Cleveland they also entertained the Rotary Club, largest and wealthiest Rotary Club of the country.

The Toledo Country Club moonlight picnic was one of the larger affairs. Among those present were Mr. and Mrs. Ben Batch, the latter being the daughter of Dr. and Mrs. Henry Hoagland of Palm Springs.

Chuck and his boys had charge of three picnics at Cape Cod. On August 6th they entertained the Oyster Harbors Country Club of Oysterville, Mass.

Seward Prosser was the host at his home in Woods Hole, Cape Cod. Mr. Prosser is the owner of the fastest yacht in America.

Sea Pines Camp, at Brewster-on-the-Cape was the third of the Cape Cod bonfire picnics.

On August 13 they put on a party for the Annisquam Yacht Club of New Gloucester, on Cape Ann. Among those present from Palm Springs were Mr. and Mrs. Harold Hicks, Mrs. Humphrey Birge and Dick Birge.

Mr. and Mrs. Ernest Stauffen, Jr., local winter residents, entertained their friends at Kennebunk Port, Maine, on August 29th, Chuck Abbott and his cowboys supplying the food and the entertainment.

The Pittsburgh Country Club was entertained on September 26. Other fashionable resort areas in which the Palm Springs cowboys were cooks and entertainers for exclusive groups were Bar Harbor and Moosehead Lake, Maine. They gave parties for F. H. Sasser of Washington, D. C., on his cotton plantation in Maryland; for Mrs. F. M. Beegle at her estate in Beaver Falls, Maine; Harvey Bissel of carpet sweeper fame on his ranch at Las Cruces, New Mexico; Bunny Todq at Pittsburgh; Inez Wallace at Cleveland.

Mr. Abbott saw many noted Palm Springs winter residents at the various parties, who greeted him warmly and declared their intention to return here this winter.

Dr. M. L. Lachman, who has offices on Palm Canyon Drive, is in Chicago taking post graduate work in preparation for a very busy season in Palm Springs, and will return here on October 25.

Tommy Jones' famous 10-piece Loyola orchestra will furnish the music at the first open air dance of the season in the garden of the Desert Inn, which will be held tomorrow (Saturday) evening. Arrangements are being made for an exceptionally good program.

**IN THE JUSTICE COURT**

Judge Fredericks put in an exceptionally busy time early this week in meting out sentences.

J. O. Sears, Cabazon, intoxication, fined \$20 or 10 days in jail.

Ethel Irene Foster, Palm Springs, drunk, six months suspended sentence provided she leave San Geronio township.

Choy, Korean of Palm Springs, drunk, fined \$20, bail forfeited.

Jack Alsop, Palm Springs, intoxication, \$20 bail forfeited.

J. G. Davidson, Palm Springs, intoxication, \$20 bail forfeited.

Keith Helmick, Palm Springs, intoxication, city case, fined \$10 to pay.

**DESERT RIDERS TO  
HAVE 1ST BREAKFAST  
RIDE ON NOVEMBER 4**

The Desert Riders will have their first breakfast ride of the season on Wednesday, November 4, to the smoke tree forest, where breakfast will be served by Chuck Abbott at 8:30 o'clock. Mr. Abbott has been engaged as cook and entertainer for the season. The annual election of officers will also be held at this first breakfast ride. Dr. Henry Hoagland and Chuck Morrison were appointed a nominating committee to select the new officers. All members are urged to participate in this first ride of the season, for the meal will be exceptionally good. Chuck Abbott has had unusual experience in broiling steaks this summer on a tour of 14,000 miles, broiling steaks for more than 3,000 of the country's most noted beefsteak epicures.

him a strong, irrevocable contract allowing him to sue and demand that the land be allotted. Under an old order it was planned in 1923 and later in 1927 to allot this land, but the majority of the tribe opposed the plan and the selections which had been attempted by a small number were turned down and the matter was dropped—everything showing that the land was NOT ALLOTTED. Now this man comes along and he sees an opportunity to make large fees by urging some of the Indians to place their case in his hands.

"Mr. Collier, the Commissioner of Indian Affairs, who at that time was not the commissioner, conferred with the local Indians and assisted us in opposing the allotment plan, and we were successful. Mr. Collier stands with us today the same way. \* \* \*

"We have twice within the first year made a regular division by check of certain funds in our possession. We use the funds to assist our needy, the sick, in the protection and improvement of our tribal property, build fences, keep the bath house in condition, fix roads, etc. The people whom he represents have received their share, and we have advised Superintendent Dady, that we are ready to look after any of our needy, and they all know this.

"The court has now ruled against Sloan in asking that a certain white man be removed from allotted land. It is NOT allotted the court, as we understood, ruled. We are now arranging for regular legal counsel to defend our rights—the larger group and make a determined fight against these instigators, so that we can go ahead with our plan to clean up our lands and improve living conditions."

An interesting booklet, entitled "Tender feet in the Air," written by Bert Clark, Los Angeles banker, and his daughter, Miss Bernadine Clark, has been received by friends of the two in Palm Springs. Mr. Clark and his aviator daughter flew 6,000 miles through 17 states this summer, and the booklet deals in their experiences on this aerial journey.

**PROGRAM FOR THE  
COMMUNITY CHURCH**

Getting into full action the Community church announces the following program:

Sunday school began a week ago with 55 pupils present. One hundred are expected at an early date. All children and young people are invited.

At the worship hour, 11 o'clock, Dr. Macartney will continue the series of sermons on Single Words of the Bible.

Commencing Sunday night, the 25th, the young people of the community will inaugurate their program. Each Sunday night moving pictures secured from the Extension Department of the University of California, will constitute a part of the program. The opening number will be on the Old Spanish Missions when and how they were founded, and one reel on the Mid-Winter Beauties of Yosemite Valley.

The course through the entire winter will cover various topics. Travel, natural scenery, historical events, astronomy and kindred topics. It will provide an interesting Sunday night for all who care to take them in. The pastor desires to be informed of cases of sickness and will be glad to be of service to any in need. The church is located on Cahulla and Barristo streets, two blocks west of Palm Canyon Drive.

Little Suzanne Gale, niece of Carol Bonte and Ted Gale, famous cartoonist of the Hearst newspapers, received major burns this summer in her mountain cabin when her clothes became ignited from a roaring fire in the fireplace. The child's life was saved by her father, Rex Gale, when he placed her on the floor and snuffed out the blaze with his own body. He therefore received burns nearly as serious as those of his young daughter. Carol Bonte and her daughters, Joan and Nancy, were in the cabin when the accident occurred.

Mr. and Mrs. Vic Potel of Hollywood are here enjoying a few days' sunshine.
